

# CaPETall™

**100% PET Resin for Bottle Caps**

The new, innovative, sustainable solution for a 100% PET Packaging System.

**NOW 100% PET**

## Why CaPETall™ Matters

Developed by Alpek Polyester to solve the challenge of PET caps, CaPETall™ creates a 100% PET Packaging Solution that simplifies recycling and enhances circular economy impact.

### Fully Recyclable

Designed for true bottle-to-bottle recycling

### High Performance

Strong, durable, and clear like traditional PET

### Sustainable Innovation

Simplifies recycling and supports the circular economy

## Technology Advantages

### Patented CaPETall™ resin delivers

- Full recyclability (PET Code 1)
- Maintains PET mechanical strength & clarity
- Adaptable molecular weight polymer design
- Unlocks flowability without sacrificing performance
- Opens the possibility for new applications with thin-wall injection molded parts

# Performance in Cap Applications

➔ **Drop Impact**

➔ **Cold Temperature**

➔ **Stress Crack Resistance**

➔ **Beverage Industry Performance Standards**

CaPETall™ performs like traditional caps –but with the sustainability advantage of 100%PET.

## Sustainability Impact

### A Cap That Completes the Circle

- Single Material Solution: Enables a mono-material PET package that is widely recognized, collected, and recycled globally.
- Boosts Recycling Yields: Caps On bale quality and increases usable PET content.
- Supports Industry Commitments: Helps customers meet aggressive sustainability goals and regulatory targets.
- Closes the Loop: PET bottles and caps can be recycled together and reprocessed into new bottles, again and again.

## Ready to take the next step in sustainable packaging?

CaPETall™ by Alpek Polyester is redefining what's possible with PET.
